HEADSET STAND**
QUICK START GUIDE

THANK YOU FOR PURCHASING

SVIVE™

KUIPER
HEADSET STAND

Please read this manual before use
and keep it available for future reference.

The Kuiper Headset Stand offers a home for your headset when it's off duty.

Why leave your headset lying around? With the Kuiper, you get a rugged and stable stand that frees up desktop space when you're not using your headset. It comes with a built-in USB 3.0 Hub and audio in/out, which allow you to connect your peripherals or other devices to your stand. The Kuiper will help you stay organized, and it's a great addition to your gaming gear.

1 Aluminum Headset Stand

1 USB 3.0 Cable

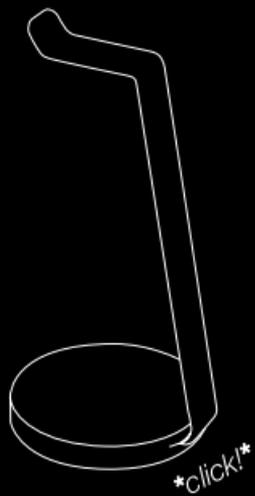

1 User Manual

ASSEMBLY

1.

2.

USER OPERATION

1. USB connection:

Connect the Headset Stand to your computer with the USB cable included.

2. Device connection

Connect your desired USB devices to the Headset Stand. The lower right corner of your computer screen will have a mobile hardware prompt, meaning the device is working normally.

3. Device ejection

Note: When you need to eject a USB device, stop data R&W first to prevent errors.

- a) Right-click the mobile hardware icon in the lower right corner of your computer screen and select "Eject USB device".
- b) It is now safe to remove your USB device.

APPLICATION

The Headset Stand can be used with USB 3.0 disk drives, high-resolution cameras, video surveillance cameras, digital video cameras, as well as multi-channel audio and other broadband peripherals. It supports simultaneous connection of high-speed USB 3.0 interface devices, with testing speeds up to 5Gbps.

NOTE

Do not place this product in damp environments. Avoid storing the Headset Stand in direct sunlight or high temperature environments. Improper use, demolition or operation not according to the instructions that results in any damage to your device or Headset Stand voids your warranty.
